Background

This specialized module introduces the theme of climate change and children, with the aim to provide a children's perspective to the discussions on how to deal with this global crisis. The module will present how children are and can be impacted by climate change.

It will then look at how children's resilience to climate change could be strengthened and at the benefits that can be provided by mitigation measures. It will also discuss solutions, focusing on the empowerment of children as actors of change and on the key role of Governments in children's protection. Several examples are provided to illustrate the concepts presented.

The course module has been developed and peer-reviewed through UN CC:Learn (www.uncclearn.org), in close collaboration with the United Nations Children's Fund (UNICEF).

Target Groups

The module provides clear, concise and up-to-date information for anybody interested in taking a children's perspective on climate change. It should be of particular interest to the following audiences:

- Civil servants in national ministries, provincial departments and local authorities working in the field of climate change, children/youth and development;
- Private sector managers, practitioners, and representatives of development partners active in the area of climate change and/or children's protection;
- Faculty, researchers and students; and
- Interested citizens/youth/students.

Course Structure and Learning Objectives

This specialized module has five sections:

1. The Impact of Climate Change on Children
2. Strengthening Children's Resilience to Climate Change
3. The Benefits of Climate Change Mitigation for Children
4. Empowering Children to Act on Climate Change through Education
5. A Climate Change Agenda for Children

Learning Objectives

After completing this specialized module, participants will be able to:

- Explain how climate change can affect children.
- Describe how measures to build climate resilience and mitigate climate change can benefit children.
- Illustrate key instruments and good practices for empowering children to act on climate change.

- Identify opportunities for protecting children’s rights in a changing climate.

Methodology, Certification and Feedback

The module is self-paced and not moderated. It includes an interactive lesson and a quiz. To receive a certificate of completion, the associated quiz needs to be successfully passed.

The *interactive lesson* presents content supported by case studies, videos, external links and exercises. The lesson takes around 2-3 hours to complete. The module is also available as a downloadable Power Point presentation that can be used for offline study or for training purposes. The module also contains a wealth of links to other resources on climate change and are thus a gateway to more in depth and specific information.

The *quiz* can be completed at any time. It assesses the achievement of the learning objectives for the module. The quiz can be attempted a maximum of three times. Once the quiz is passed with at least 70% of correct answers, the learner can download a certificate of completion from the course home page.

After the completion, participants will be requested to submit a feedback form, which can be accessed in the ‘Certificate and Course Evaluation’ section on the course home page.

Technical Requirements

Browser:

- The course works best with Firefox 3.6 or higher (download for free at <http://www.mozilla-europe.org/en/firefox>).
- The course is also compatible with Google Chrome (download for free at <https://www.google.com/intl/en/chrome/browser/>).
- For technical reasons, it is not recommended to use Internet Explorer.
- Note JavaScript & Cookies must be enabled.

Software:

- Adobe Acrobat Reader (download for free at <http://www.adobe.com/products/acrobat/readstep2.html>).
- Adobe Flash Player (download for free at <http://get.adobe.com/flashplayer>).
- Microsoft Office (Windows or Apple version) or Open Office (download for free at <http://www.openoffice.org>).

Platform: Windows 95, 98, 2000, NT, ME, XP or superior; MacOS 9 or MacOS X

Hardware: 64 MB of RAM, 1 GB of free disk space

Modem: 56 K

About UN CC:Learn

UN CC:Learn is a partnership of more than 30 multilateral organizations supporting countries to design and implement systematic, recurrent and results-oriented climate change learning. At the global level, the partnership supports knowledge-sharing, promotes the development of common climate change learning materials, and coordinates learning interventions through a collaboration of UN agencies and other partners. At the national level, UN CC:Learn supports countries in developing and implementing national climate change learning strategies. Through its engagement at the national and global levels, UN CC:Learn contributes to the implementation of Article 6 of the UNFCCC on training, education and public awareness-raising, and the 2012-2020 Doha Work Programme. Funding for UN CC:Learn is provided by the [Swiss Government](#) and UN partners. The Secretariat for UN CC:Learn is hosted by the UN Institute for Training and Research ([UNITAR](#)).
