Inter-American Development Bank
Knowledge and Learning Approach to Climate Change
KM Approach 2 CC

Support both inside the Bank and in the Region the creation, dissemination and re-use of key knowledge on climate change and facilitate a better understanding of its main challenges with the final aim of promoting economic, social and environmental development in LAC.
More specific objectives:

- Providing with the right information/knowledge on ways to address climate change and sustainability issues, at the right time;
- Collecting and sharing good/best practices and tools;
- Learning from project successes/failures to design/innovate and improve climate change projects and programs;
- Facilitating cross-project learning inside the Bank, and among countries in the Region;
- Guiding the production of updated and properly packaged knowledge products to its intended audiences;

Supporting the implementation of the CCS, connecting the knowledge demand/needs of the external audiences with the knowledge offer/production of the Bank.
## Preparation and Programming of Interventions
