Investing in People and Learning to Foster a Green and Climate Resilient Transition

UN CC:Learn
The One UN Climate Change Learning Partnership
UN CC:Learn is a partnership of more than 30 multilateral organizations supporting countries to design and implement systematic and results-oriented climate change learning. With our partners across the UN system and in our partner countries, we promote capacities to ensure continuous and strategic approaches to the provision of knowledge and skills.

**Global Level**

At the global level, the partnership supports knowledge-sharing and the dissemination of common climate change learning materials. It also coordinates training interventions through collaboration of UN agencies and other partners, contributing to a growing critical mass of professionals and individuals with the necessary understanding of the basics of climate change to inform their decisions and take effective action.

**National Level**

At the national level, UN CC:Learn supports countries in addressing learning priorities relevant to their National Determined Contributions (NDCs) and National Adaptation Plans (NAPs), through the development and implementation of climate change learning strategies, in collaboration with national education and training institutions. UN CC:Learn engages with over 25 countries.

The Secretariat for UN CC:Learn is hosted by the United Nations Institute for Training and Research (UNITAR). Funding for UN CC:Learn is provided by the Swiss Government and UN partners.
# Key Results

## Global and National Levels

- **Global knowledge-sharing market place for climate change learning** providing all the latest and best offers from the UN system.

- **Registered participants from 195 countries** using our free e-learning platform offering learning materials on many different climate change topics.

- **Certificates of completion issued so far** for our e-learning courses on climate change available in 8 languages.

- **The “Climate Classroom” initiative** providing quick climate change highlights in 45-minute pop-up style lessons.

- **Regional climate change learning strategy launched** in the Central American Integration System (SICA), which includes eight countries, and regional hub set-up in West Africa involving 13 countries.

- **+220,000**

- **+55,000**

- **USD + 4 million**

  leveraged from national or international sources for further implementation of the national climate change learning strategies.

- **13 national climate change learning strategies**

- **Live Youth Climate Dialogues** bringing together school students from very different contexts to debate on the global-local nature of climate change.

- **BENIN, BURKINA FASO, DOMINICAN REPUBLIC, ETHIOPIA, GHANA, INDONESIA, KENYA, KYRGYZSTAN, MALAWI, NIGER, UGANDA, ZAMBIAN, ZIMBABWE**
Funding for UN CC:Learn is provided by the Swiss Government and UN partners.
