The World Food Programme’s Safe Access to Fuel and Energy (SAFE) addresses the serious challenges faced by the most vulnerable people linked with access to cooking fuel.

Global Cookstoves Survey

In 2015, WFP conducted a survey of its cookstove activities to better understand how to scale up its SAFE programmes. These are the key findings:

### Top 4 concerns
- Environmental degradation
- Lack of access to cooking fuel
- Protection issues linked to gathering firewood
- Inadequate cooking of food and water

### Top 5 interventions
- Provide institutional cookstoves to schools
- Train people on how to cook food with less fuel
- Provide household cookstoves to families
- Increase fuel-wood sources by planting community forests & nurseries
- Train people to make their own cookstoves

### Types of interventions
- School Meals
- Asset Building
- Nutrition
- Carbon Credits

### Partnerships
- Government
- Local NGOs
- Private sector
- International NGOs

### Challenges
- Staff capacity
- Funding
- Technical expertise
- Procurement expertise

WFP commits to help 10 million people to safely prepare their meals through SAFE activities by 2020. To scale up SAFE projects, WFP has launched the “10x20 campaign” to support this commitment.
