Open Online Course on Gender and Environment

Do you want to find out why promoting gender equality and women's empowerment can help deliver better environmental outcomes, and to figure out how you can do it?

The course will help you better understand the linkages between gender and the environment. It will provide you with the knowledge and tools to mainstream gender, and to be an effective changemaker for sustainable development.

The course will give you facts and figures, and a better understanding of the global international frameworks related to gender and environment.

It is a "one-stop-shop" for information and illustrations on gender dimensions linked to biodiversity, climate change, land degradation, international waters, and chemicals and waste.

All you need to know about gender and the environment!

Convention on
Biological Diversity

United Nations
Framework Convention on
Climate Change

United Nations
Convention to Combat
Desertification

Stockholm Convention
on persistent organic
pollutants (POPs)

Who should take this course?

Someone curious and interested to learn more about how efforts to address environmental degradation and promote gender equality can be mutually supportive

- A specialist working on biodiversity, climate change, land degradation, international waters, chemicals and waste
- A development practitioner working at the international, national or at the local level in environmental sectors
- A policy-maker or government official working on environmental • policies and projects

Depending on your areas of interest, you can “pick and choose” between any of the following five modules:

Introduction

Climate Change

International Waters

Biodiversity

Land Degradation

Chemicals and waste

What will you learn?

What are the links between gender equality and environmental sustainability?

Which global environmental frameworks include gender?

How can gender-responsive policies and projects support environmental outcomes?

Discover what you can do to promote gender equality and women’s empowerment in biodiversity, climate change, land degradation, international waters, chemicals and waste.

This is your chance!
