## WHAT IS A YOUTH CLIMATE DIALOGUE?

A virtual debate between two groups of young people from different parts of the world, leading to personal reflection and learning.

It brings together students to talk about climate change, informing the climate debate and adding new perspectives to climate change education across the globe.

## HOW DOES IT WORK?

Setting up a Youth Climate Dialogue involves 4 phases:

Planning

Student Preparations

Implementation

Sharing your experience

## WHAT IS NEEDED TO PREPARE?

Make sure you come prepared! If you come ready to share your insights, experiences and stories you will enrich the discussion and shape everyone's learning journey.

# FREE

online courses

Come prepared! Use high quality e-courses accredited by the United Nations and tailor your learning journey to fit your own context.

- Cities and Climate change
- Sustainable Diet

- Climate change: from learning to action
- Children and Climate change
- Human Health and Climate change

- and many more!

## A TRUSTWORTHY MESSENGER

the magic of the youth dialogues is that the information comes from a peer in another country

### THE DIALOGUES PROVIDE:

"HERE IN SWITZERLAND WE DON'T SEE CLIMATE CHANGE AS MUCH AS YOU DO. IN MALAWI IT'S APPARENTLY MUCH WORSE, SO THIS CONVERSATION HAS REALLY OPENED OUR EYES TO WHAT IS HAPPENING"

Youth with a much-needed platform to discuss climate change with their peers in other countries and to voice their ideas and experiences.

### STUDENTS CAN DISCUSS HOW:

Climate change is perceived in their part of the world, how it affects their lives, and what actions they consider most important.

A UN CERTIFICATE OF PARTICIPATION IS AWARDED TO PARTICIPANTS!

YANDE AND RUBEN

A MESSAGE FOR YOU!

They both participated in one of our Youth Climate Dialogues!

"IF TOMORROW THE WORLD WILL NO LONGER KNOW ABOUT CLIMATE CHANGE, IT WILL BE THANKS TO THE CHILDREN OF TODAY"

The Youth Climate Dialogues

were launched in the lead up to @COP21, in Paris - 2015
