

Think, Learn, Act Climate

# UN CC:Learn

**We are convinced that widespread climate action will only catch on through widespread climate education and learning.**

UN CC:Learn is a partnership of more than 30 multilateral organizations working to scale up climate change learning and literacy worldwide.

It is a unique capability because it works across the entire UN system supporting partner countries, institutions and individuals. At UN CC:Learn we help our partners to build the ability to provide climate change knowledge and skills on a continuous basis; helping to drive action and shape a better future.

*“Climate education is crucial for raising the ambition we need to address the existential threat of climate change. In that spirit, it gives me great pleasure to recognize the work of the One UN Climate Change Learning Partnership.”*

*António Guterres, UN Secretary-General*

We are working to achieve the following interlinked objectives:

Learning for NDCs and NAPs

We help partner countries implement their NDCs and NAPs by promoting the broad basis of knowledge and skills across government and society that we know is necessary for coordinated climate change action to happen.

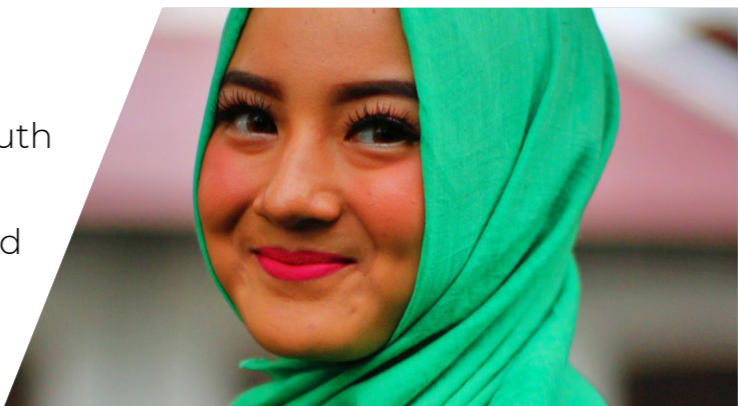

Engaging with Learning Institutions

We work alongside national education and training institutions to integrate climate change education in their curricula, from formal curriculum development in general education to professional skills development in training academies.

Strengthening Youth Capacity

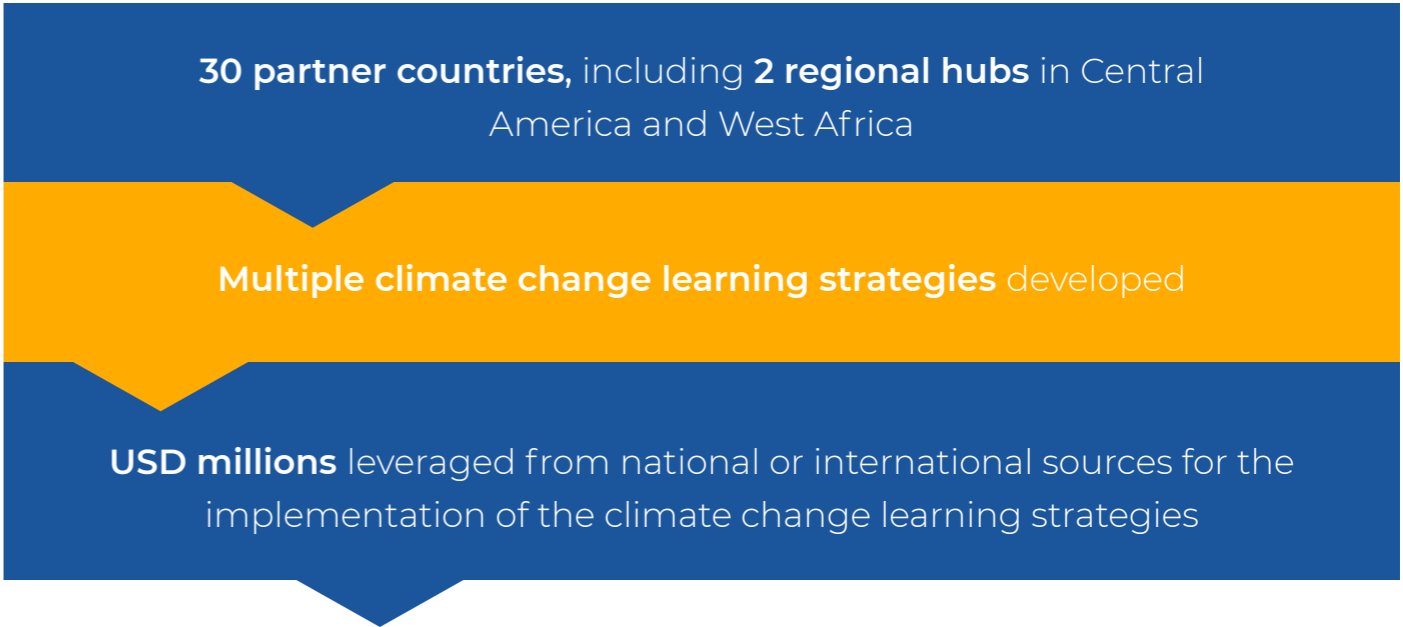

We strive to strengthen and give voice to youth and youth networks so they can actively participate in the climate change debate and take informed action on climate change.

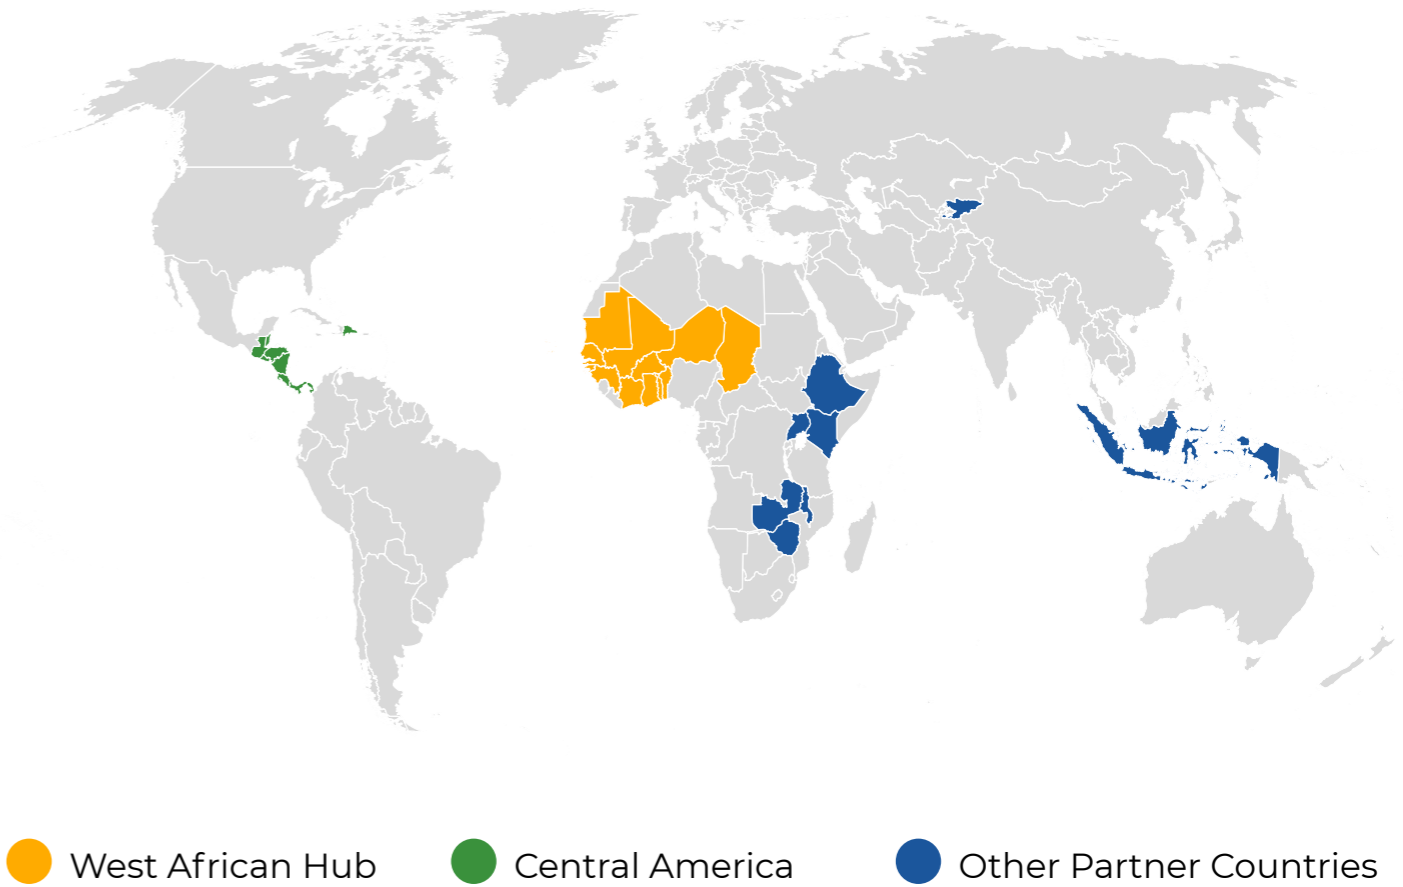

Learning for Citizens and Professionals

We provide free e-learning resources to the public in multiple formats that are also accessible to persons with disability, as well as other training opportunities that support understanding, awareness, and motivation to change attitudes and behaviors in matters related to climate change.

Strategic Approach to Climate Change Learning in Partner Countries

Countries Supported by UN CC:Learn as of March 2022

Strengthened Education and Training Institutions

Teachers Trained

Over **4,000 teachers trained** in the Dominican Republic, Ghana, and the Kyrgyz Republic.

New **teaching materials on climate change** topics adopted in Ghana, Malawi, Uganda, as well as Central America.

Teaching Materials

Guidelines

**Guidelines** for the **integration of climate change into school curricula** supported in Ethiopia and Kenya.

**Training of Trainers** for learning institutions on e-learning development in West Africa.

Training of Trainers

Youth Engagement and Action on Climate Change

**1,000+ students benefitting from Youth Climate Dialogues** organized with schools from 26 countries.

**Youth speakers supporter to deliver TEDx Talks** on climate action.

Organization of **youth-led initiatives in partner countries**, such as itinerant workshops in rural areas of Zimbabwe.

Scaling Up Global Climate Literacy

**+500,000**

registrations on the UN CC:Learn e-learning platform

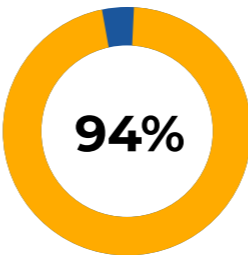

**+175,000**

certificates of completion issued since 2014

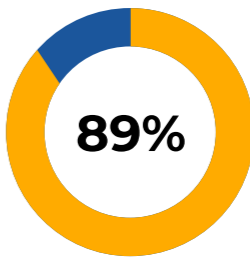

**+35**

e-courses on climate change and green economy

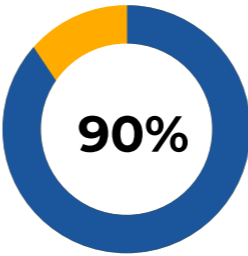

Our latest impact survey shows that:

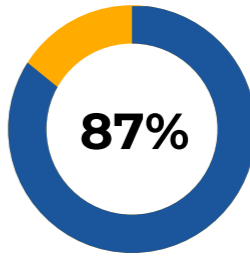

of respondents said they have found the e-courses useful.

of respondents have changed their consumption pattern and altered how they think and act in relation to climate change.

of respondents have become more confident to speak or advocate for climate change after taking a course

of respondents have applied or used the knowledge from the course taken.

More impact:

Outreach to **millions of listeners** through national **radio programmes on key climate messaging** for communities in South Africa

**Multiple editions** over 5 years of **our flagship Climate Classroom @ COP** held, with thousands of beneficiaries

## Supporting the SDGs and 2030 Agenda

We strive to make a meaningful contribution across all the **SDGs** in support of the **2030 Agenda**.

UN CC:Learn directly contributes to **SDG 13**.

We also advance **SDGs 4, 5, 6, 7, 12 and 17**.
