

Think, Talk, Act Climate

UN CC:Learn

The One UN Climate Change Learning Partnership (UN CC:Learn) is a partnership of more than 30 multilateral organizations working on several fronts to scale up climate change learning worldwide.

With our partners across the UN system and in our partner countries, we promote capacities to ensure continuous and strategic approaches to the provision of knowledge and skills that will help drive action on climate change and shape up a better future.

“Climate education is crucial for raising the ambition we need to address the existential threat of climate change. In that spirit, it gives me great pleasure to recognize the work of the One UN Climate Change Learning Partnership.”

António Guterres, UN Secretary-General

We are working to achieve the following interlinked objectives:

Learning for NDCs and NAPs

We help partner countries establish their NDCs and NAPs by promoting intersectional and coordinated climate change action through a coordinated approach to education and learning.

Engaging with Learning Institutions

We work alongside national education and training institutions to integrate climate change education in their curricula.

Strengthening Youth Capacity

We strive to strengthen youth capacity and youth networks so they can actively participate in the climate change debate and take informed action on climate change.

Learning for Citizens and Professionals

We provide free e-learning resources to the public in multiple formats that are also accessible to persons with disability. We also provide training opportunities that spark changes to attitudes and behaviors in matters related to climate change.

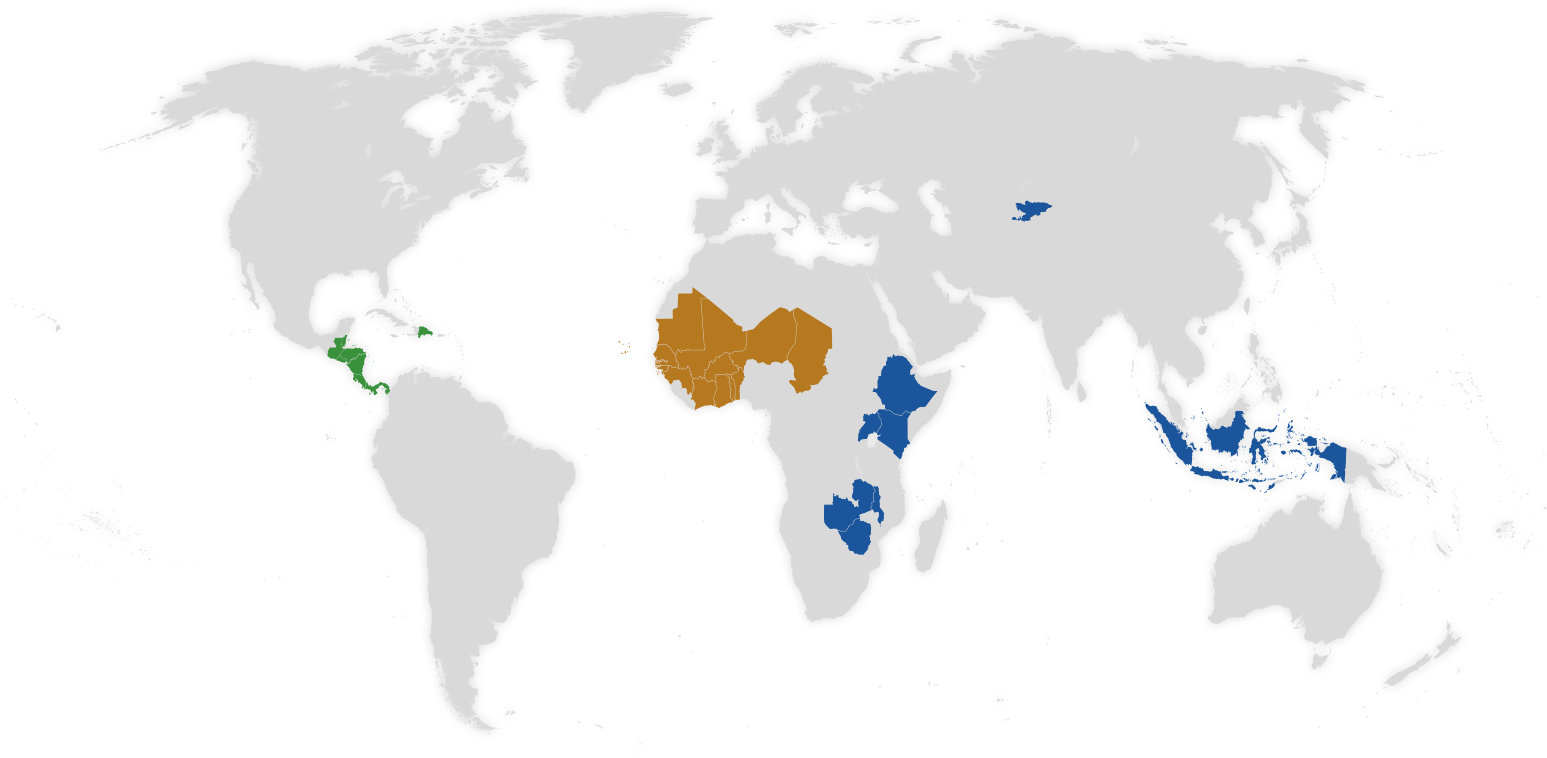

Strategic Approach to Climate Change Learning in Partner Countries

30 partner countries, including **2 regional hubs** in Central America and West Africa

15 national climate change learning strategies developed and many more inspired to replicate.

+30 million USD leveraged from national or international sources for the implementation of the climate change learning strategies

Countries Supported by UN CC:Learn as of March 2022

● West African Hub ● Central America ● Other Partner Countries

Strengthened Education and Training Institutions

Teachers Trained

Over **4,000 teachers trained** in the Dominican Republic, Ghana, and the Kyrgyz Republic.

New **teaching materials on climate change** topics adopted in Ghana, Malawi, Uganda, as well as Central America.

Teaching Materials

Guidelines

Guidelines for the **integration of climate change into school curricula** supported in Ethiopia and Kenya.

Training of Trainers for learning institutions on e-learning development in West Africa.

Training of Trainers

Youth Engagement and Action on Climate Change

+1,000 students took part in 39 Youth Climate Dialogues organized with schools from 26 countries.

Multiple youth speakers delivered TEDx Talks at The Tide Is Rising and Regeneration, TEDx events supported by UN CC:Learn.

Organization of **youth-led initiatives in partner countries**, such as itinerant workshops in rural areas of Zimbabwe.

Support of youth-led **Radio and TV programmes** in Malawi, Zambia and Zimbabwe.

Scaling Up Global Climate Literacy

+785,000

registrations on
the UN CC:Learn
e-learning platform

+350,000

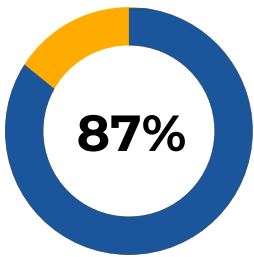

certificates of
completion issued
since 2014

+50

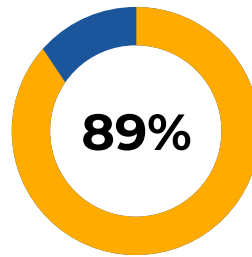

e-courses on climate
change and green
economy

66 editions of the flagship Climate Classroom initiative held with **3,000** beneficiaries reached.

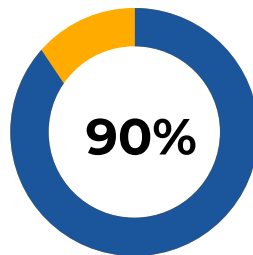

Our latest impact survey shows that:

of respondents have
applied or used the
knowledge from the
course taken.

of respondents
have changed their
consumption pattern
altered how they think
and act in relation to
climate change.

of respondents have
become more confident
to speak or advocate for
climate change after
taking a course

Supporting the SDGs and 2030 Agenda

We strive to make a meaningful contribution to the **SDGs** and the **2030 Agenda**.

UN CC:Learn directly contributes to **SDG 13**.

We also advance **SDGs 4, 5, 6, 7, 12** and **17**.
