“ I learned a lot about different issues, such as human rights, AI, and gender inequality, and how they can be tackled along with climate change through integrated solutions. I also got the chance to meet other people who were also interested in fighting climate change, exposing me to a network of skilled and passionate people who work together to spearhead climate change efforts.”

“ My overall experience with the Climate Classrooms at COP30 was truly inspiring and intellectually enriching. Each session provided valuable insights into global climate action, sustainability, and innovative solutions. The speakers were engaging, the content was relevant and well-structured, and the discussions encouraged real reflection and learning. It was an exceptional opportunity to expand my understanding of the climate challenges our world faces today. ”
